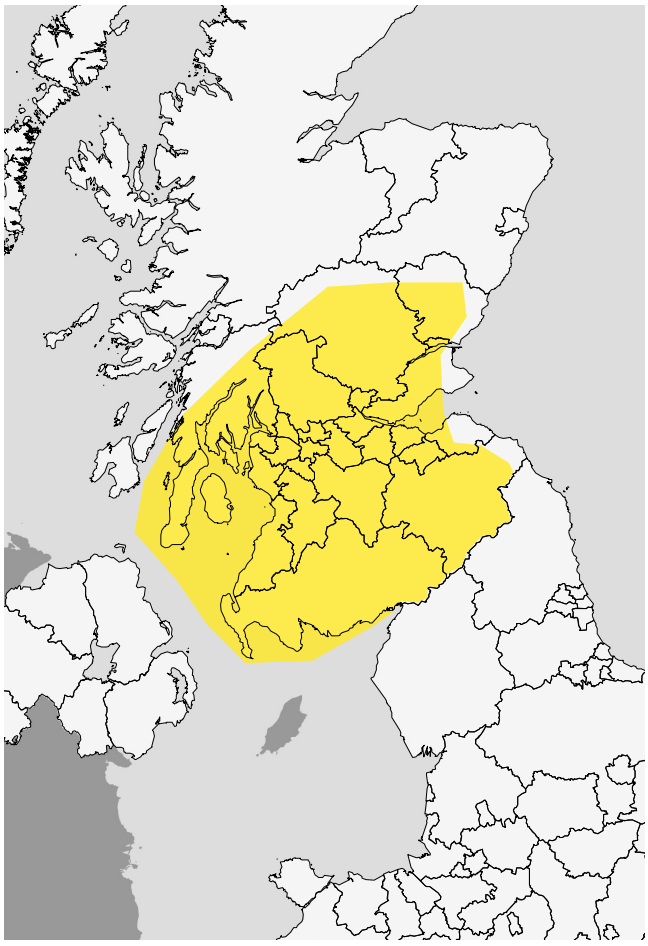
Yellow warning
Snow & Ice

Between
12:00 Thu 8 Feb 2024 and
15:00 Fri 9 Feb 2024



Some travel disruption from snow and ice is possible Thursday afternoon and overnight into Friday.

What to expect

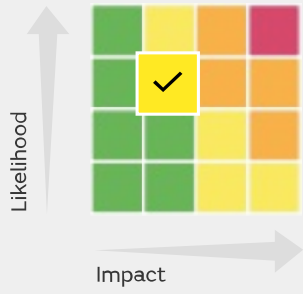
- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

Outbreaks of sleet and snow will gradually spread northwards across the warning area this afternoon, and overnight into Friday. Accumulations will vary from place to place and will mainly be across high ground (above about 300 metres) - here, some areas are expected to see 1-3 cm of snow through this period but perhaps as much as 8-10 cm in a few locations. Ice will be an additional hazard.

What should I do?

Snowy, wintry weather can cause delays and make driving conditions dangerous.



Medium likelihood of low impacts

Issued at 11:06 Wed 7 Feb, 2024 Updated at 08:54 Thu 8 Feb, 2024

Yellow warning
Snow & Ice

Between
12:00 Thu 8 Feb 2024 and
15:00 Fri 9 Feb 2024

Further Details (continued)

Keep yourself and others safe by planning your route, giving yourself extra time for your journey. Check for road closures or delays to public transport and amend plans if necessary.

If driving, make sure you have some essentials in your car in the event of any delays (e.g., warm clothing, food, water, a blanket, a torch, ice scraper/de-icer, a warning triangle, high visibility vest and an in-car phone charger).

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

Keep yourself and your family safe when it is icy. Plan to leave the house at least five minutes earlier than normal. Not needing to rush, reduces your risk of accidents, slips, and falls.

If you need to make a journey on foot, try to use pavements along main roads which are likely to be less slippery. Similarly, if cycling, try and stick to main roads which are more likely to have been treated.

Be prepared for weather warnings to change: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.

Reason for update

Start time has been brought forward to allow snow to reach the south of the warning area by early afternoon.
